

BARCODES FOR BUSINESS
Putting Barcodes Into Business

Elite Range

HSW Series

High Specification Windows 10 Pro
8-inch and 10-inch tablets

Elite tablets - rugged + high specification

High specification tough tablet

The HSW Series of tough tablet are the perfect choice for running warehouse and stock applications in tough, busy environments. A built-in 2D barcode reader makes for quick and accurate scanning of all 1D and 2D codes, and the full colour 8-inch or 10-inch touch screen allows for easy manual data entry. The rear-hand strap allows users to operate the device comfortably without needing to constantly grip the device; perfect for long shifts or intensive scanning and NFC is available as an option for card payment applications.

Applications

- Inventory control
- asset management
- manufacturing
- payment systems
- security
- access control

Complete connectivity

The HSW Series of tough tablets are designed to stay connected wherever they go, giving operators complete freedom throughout their working day. Dual band Wi-Fi allows for a fast connection to any network, and 4G network coverage allows data to be relayed while out in the field or out of Wi-fi range. 7800mAh (HSW8) or 10,000mAh (HSW10) batteries provide all day power.

Waterproof and drop resistant

The HSW Series of tough tablets have been specially designed to withstand tough working conditions. An IP65 (10-inch) and IP67 (8-inch) seal rating means it's completely protected from water, dust and dirt, and accidental drops of up to 1.2 metres won't cause any damage to the device.

HSW Series

High Specification 8-inch & 10-inch Windows 10 Pro tablets

HSW Series Technical Specification

Models	HSW8	HSW10
